Final Year project(FYP) Proposal Form for (7th Semester)

Project Title:	**SmartFAQ – AI-Powered Website Assistant**
Group Member:	**Group#** M. Ahmad Raza (F23BINFT1M01189)
Technical Advisor(s) (As officially assigned)	**Project Supervisor** **Name:** Mam Kainat **Signature**

Objective / Scope (Filled by Student)

SmartFAQ is an AI-powered chatbot designed to integrate with different websites and provide users with quick, accurate, and relevant answers to their questions. It uses website content, frequently asked questions, and uploaded documents as knowledge sources to generate responses in a natural, conversational manner.

The system uses Natural Language Processing (NLP), LangChain, OpenAI, and ChromaDB to understand user queries and retrieve relevant information. It also includes an administrative dashboard that allows website owners to manage chatbot configurations, upload knowledge sources, and monitor user interactions and feedback.

SmartFAQ can be integrated into existing websites through API or iframe integration, making it a flexible and reusable solution for various domains, including education, e-commerce, business, and customer support. Its main goal is to improve information accessibility, reduce repetitive inquiries, and enhance the overall user experience.

Note: After the Supervisor's Signature.

- **Submit one hard copy to Project's Supervisor**
- **Pass the original copy to the Departmental PYP coordinate. Mr. Waris Ali**
